

Note: Follow Bluemix-sushi-prereqs for directions to get IDs. This may take up to 24 hours.

Create a Website using Node.js

1 In your web browser, go to IBM Bluemix™ at <https://ibm.biz/bluemix4kids> and LOG IN.

2 On a separate tab in your browser, go to DevOps Services at <https://hub.jazz.net/> and SIGN IN.

3 Open the sample project [rewillen | NodeJS_Simple_2](#) in your browser.

Note: if you are working from a hardcopy type: <https://ibm.biz/nodejs2> or EXPLORE for “rewillen”

4 Click on EDIT CODE

5 FORK the Application and give it a new name.

6 Open the [views](#) folder, and then Click on [index.ejs](#) to edit the HTML.

7 Edit the <title> and <h1> tags to say your name <h1>My name web site</h1>

8 DEPLOY the Application. Wait for the deployment to complete and the green box shown in Step 6 to appear.

6 See the Manual Deployment page by following the root folder page link in the green box message.

- 7 Wait until the Manual Deployment information refreshes on the page, and you see a green success indicator for your deployment.

- 8 Click on the [NodeJS_Simple_2](#) link to view your application.

- 9 A separate browser tab will open with your application. You should see the text you changed.

- 10 Refresh the application in the browser. * What happens? The count should be incremented.
